

___ Age ______ Sex_____ Date_ Name Stress is a normal part of life. Every day, we're faced with stimuli, called stressors, which can elicit the body's "fight or flight" response, setting off a cascade of physiological reactions and resulting in emotions ranging from mild to intense. But while occasional stress is natural and even healthy, chronic or acute stress can be harmful. Please take a few moments to discover your body's response to situations you perceive as stressful. By honestly assessing how you feel, your healthcare provider can create a stress relief program for your individual needs. Please read each statement and circle the number 0, 1, 2, or 3 that best describes your feelings or reactions throughout the course of the day. Determine the subtotal score for each section, then determine the total scores for sections A-C and C-E. Some questions may appear redundant between sections. There's a reason for each question. Don't spend much time on any one question. 0 =Never true 1 =Seldom true 2= Sometimes true 3= Often true When under stress for two weeks or longer, I... Section A: 1. Get wound up when I get tired and have trouble calming down....... 0 1 5. Feel emotional—cry easily or laugh inappropriately ________0 1 3 7 8. Am constipated 0 1 10. Get mouth sores or sore tongue _______0 1 Total points: ___ Section B: 3. Feel impulsive, pent up, and ready to explode _______0 1 Get muscle spasms _______0 1 Have a hard time stopping myself from doing things again and again, Total points: ___ Section C: 2. Have muscle weakness 0 1 Crave salt or salty things _______0 1 Have multiple points on my body that when touched are tender or painful 0 1 Have diarrhea or bouts of nausea with or without vomiting for no apparent reason 0 1

Have headaches _______0 1
